Geomatics is a field of activities which, using a systemic approach, integrates all the means used to acquire and manage spatial data required as part of scientific, administrative, legal and technical operations involved in the process of the production and management of spatial information.

La géomatique est un champ d'activités qui intègre, selon une approche systémique, l'ensemble des moyens d'acquisition et de gestion des données à référence spatiale requis pour effectuer les opérations scientifiques, administratives, légales et techniques dans le cadre du processus de production et de gestion de l'information sur le territoire.
