Avant-propos

Harold E. Jones
Rédacteur - Index cumulatif

Cet index cumulatif du G6ometre canadien couvrant la période de 1970 à 1987 est le troisième d'une série d'index cumulatifs publics périodiquement. Ce sont les index de la revue de l'Association canadienne des sciences géodésiques et cartographiques et de ses prédécesseurs. Le premier index couvrait la période de 1884 à 1955 et le second de 1956 à 1969.

Une grande partie du travail de cet index a été effectuée par monsieur Jim Mazerall à l'aide d'un système de fiches base sur les entrées des index annuels pour chaque volume. Avec l'acquisition, par l'association, d'un système d'édition électronique, le travail de monsieur Mazerall a pu être poursuivi et automatisé pour produire ce volume. Il est à souhaiter qu'il sera utile à ceux qui recherchent des articles techniques ainsi qu'à ceux intéressés aux activités générales des arpenteurs et de l'association.

Les références sont données sous la forme:

Volume (numéro) pages (*inclusives*); ex: 24(5) 550-560.

Les inscriptions selon le nom de l'auteur sont en majuscules;
ex: YOUNGS, C.W.

Les inscriptions du nom d'une personne en tant que sujet ne sont pas en majuscules;
ex: Youngs, C.W. (*au sujet de et non pas par Youngs*).

Les inscriptions par titre, soit direct ou inversé,
sont suivies du nom de(s) l'auteur(s) entre parenthèses;
ex: Map Projection and Grids (L.M. Sebert).

Toute information supplémentaire concernant une inscription est donnée entre crochets;
ex: Laflamme, Gaston [nécrologie].

Foreword

Harold E. Jones
Editor — Cumulative Index

This cumulative index of *The Canadian Surveyor* for the period 1970 to 1987 is the third in a series of periodically published cumulative indexes of the regularly published journals of the Canadian Institute of Surveying and Mapping and its predecessors. The first covered the period 1884 to 1955 and the second 1956 to 1969.

The initial major work on this index was done by Mr. Jim Mazerall using a card system based on entries from the annual indexes for each volume. With the acquisition of desktop publishing facilities by the Institute his work was continued and automated to produce this volume. It is hoped that it will be useful those researching technical papers and as well as to those interested in the general activities of surveyors and the Institute.

References are given in the form:

Volume number (issue number) inclusive paging; e.g. 24(5) 550-560

Entries by author's name are in caps, e.g.; YOUNGS, C.W.

Entries of a person's name as subject are not capitalized;
e.g., Youngs, C.W. (i.e., *about* not *by* Youngs)

Entries by title, either direct or inverted, are followed by the author's name(s) in round brackets;
e.g., Map Projections and Grids (L.M. Sebert).

Supplementary information concerning an entry is given in square brackets;
e.g., Laflamme, Gaston [necrologie].
